**Official company statement re: SunModo Racking Compatibility**

SunModo racking systems offer full compatibility with all APsystems microinverters, including the YC500A, YC500i, YC600, QS1 and YC1000 models.

We have proudly worked with SunModo for years to maintain interoperable compatibility and recommend their quality products for use with our inverters.

If you have any questions about best practices using SunModo racking with APsystems microinverters, contact SunModo. For APsystems technical support, email [support.usa@apsystems.com](mailto:support.usa@apsystems.com).

Sincerely,

Christopher Barrett  
Director of Technical Services, USA  
APsystems
