

SUNDOCK™
STANDING SEAM
RAIL-FREE ATTACHMENT
SYSTEM

SunModo introduces the SunDock™ Standing Seam attachment; the solar industry's only single clamp PV attachment system.

The SunDock™ Standing Seam attachment is a Mid Clamp and End Clamp all rolled into one. This unique universal clamping system can secure PV panels ranging in height from 30mm to 50mm and it attaches to almost any standing seam roof profile.

SunDock's integrated bonding pins address the stringent bonding requirements of UL2703 creating a continuous bond path throughout the array. This one pre-assembled universal attachment is the only attachment needed; no spacers, no blocks and no sweat.

Features & Benefits:

- Attaches to most standing seam panel profiles
- Universal Mid and End Clamps
- 30-50mm Panel Clamping Range
- Integrated electrical bonding
