

Domestic Content Update

November 2024

Summary

In response to the recent interest in having Domestic Content available in racking materials, SunModo is happy to announce our ability to meet this demand.

- In some cases, Asset Owners can achieve an additional 10% ITC bonus credit if a project uses materials that satisfy the requirement of 40% Domestic Content.
- SunModo racking can now count towards achieving that minimum requirement.

Details

All SunModo rail is now available in a version that qualifies as Domestic Content. This includes the following part numbers:

- SMR100-XXX-M-US (A20422-XXX-ML-US) – SMR100, Mill Finish, all rail lengths
- SMR100-XXX-B-US (A20422-XXX-BK-US) – SMR100, Black, all rail lengths
- SMR300-XXX-M-US (A20444-174-ML-US) – SMR300, Mill Finish, all rail lengths

Planning For the Future

We are continuing to be proactive with our supply chain in order to meet the continuously changing demands of our industry and enable us to always provide the support our Installers and Distributors need. We expect to have Domestic Content available if needed for our full line of products in Q1 of 2025.

Note

Statements made by SunModo regarding this matter are based on current federal documentation. SunModo does not provide any tax, legal, accounting, or financial advice. This update is intended solely for informational purposes. Always consult your own advisors.
